Statement of Qualifications

My name is David Carrier Jr, and I am a qualified Accident Reconstructionist. I have successfully completed an accredited Accident Reconstruction training program through the Georgia Public Safety Training Center, and I have continued my specialized education and practical involvement in field.

My professional background began in July of 2004 as a 17 year old high school student when I joined the United States Army, during which I was deployed both to both Operation Iraqi Freedom and Operation Enduring Freedom. Following my medical retirement in 2014, I began my law enforcement career with the Windsor Police Department in Windsor Vermont in 2015 as a Patrol Officer.

In 2016, I moved to Savannah Georgia and joined Savannah Police Department. I started on patrol working minor accidents as well as responding to routine police calls for service. Throughout the years I worked on various units and specialized units to include EOD (bomb squad), SWAT, violent crimes task force, dignitary protection, motor unit, crime suppression unit, and traffic unit.

In 2020, I moved over to the traffic unit and joined the DUI task force (H.E.A.T) which focuses on reducing traffic crashes and fatalities by aggressively policing impaired drivers. In 2022, I was moved into the traffic investigation unit as a Traffic Reconstructionist. I completed all of Georgia Public Safety Training Center's Accident Reconstruction training that consisted of over 288 hours of specialized training. I have since continued enhancing my knowledge in the field and have over 800 hours of specialized training in accident reconstruction. In my law enforcement career, I have investigated and testified on over 100 cases involving liability, and causation of motor vehicle crashes.

I am prepared to testify as an expert in the fields of accident reconstruction and investigation and to offer opinions within the scope of my training, education, and experience.
